This water is interior to note in the State, as it holds in solution sulphureted hydrogen, iodine, and magnesia, imparting tone to the system, and acting as a powerful alterative, as numerous visiters can teatify, having been visited for the last fifty years, and, had it not been for its contracted accommodaand, had it not been for its contracted accommodations, must have been among the first watering
places in the Union. For the last five years, the
